PROFESSIONAL SUMMARY

Full-stack engineer with **1.5+ years** in the **JavaScript/TypeScript** ecosystem who builds scalable web applications with clean **API design, layered security**, **Redis** caching and **real-time** features. Ships **containerized** services through automated **CI/CD** to **AWS** ECS Fargate, backed by **unit, integration and end-to-end** test suites. Delivered **20+ production** client websites across the world with **99+ Lighthouse** scores. **Seeking Software Engineer and Full-Stack roles.**

TECHNICAL SKILLS

Languages: JavaScript, **TypeScript**, SQL, C++, Python
Frontend: React, **Next.js** (App Router), Tailwind CSS, SCSS, HTML5, CSS3, **Redux Toolkit**, React Query, Context API, TanStack Query, Framer Motion, Responsive Design, MUI, Shadcn/UI
Backend: Node.js, **Express.js**, REST APIs, **JWT** Authentication, **RBAC**, Cookies, Bcrypt, **Socket.IO**, Zod, Nodemailer, Cloudinary, Swagger/OpenAPI, **Google Gemini API**, NextAuth, rate limiting
Databases: PostgreSQL, Prisma ORM, **MongoDB**, Mongoose, Redis
DevOps & Cloud: Docker, GitHub Actions, **CI/CD**, **AWS**, Vercel, Render
Testing: Vitest, Supertest, Playwright, React Testing Library, **unit/integration/E2E** strategy
Tools: Git, **GitHub**, VS Code, **Postman**, Figma, Lighthouse, Google Search Console, **SEO**

PROJECTS

TaskFlow AI — Distributed Task Management & Collaboration Platform | Live Demo | GitHub
Next.js 16, React 19, TypeScript, Express 5, MongoDB, Redis, Socket.IO, Zod, Gemini API, Docker, GitHub Actions, AWS ECS Fargate, ECR

- Engineered a **full-stack task management platform** with **RBAC (Admin, Manager, Employee)** enforced via JWT authentication, Socket.IO authorization, and record-level ownership, secured with **bcrypt** and **access/refresh** JWT tokens.
- Implemented a **Redis cache-aside layer** with role-based caching, SCAN-based invalidation, Zod request validation, and layered rate limiting, reducing database load while maintaining data consistency.
- Built **real-time collaboration** with **Socket.IO**, including room-based messaging, staff-only group, read receipts, live notifications, and **cursor-based pagination** for scalable chat integrated the **Gemini API** for AI task summarization and priority classification.
- Achieved **90%+ backend test coverage** with **225 automated tests** across Vitest, React Testing Library, Supertest, and Playwright E2E; documented REST APIs with **Swagger/OpenAPI**.
- Built a **4-stage GitHub Actions CI/CD pipeline** that automatically tested, containerized, and deployed Docker images to **Amazon ECR** and **AWS ECS Fargate** via **OIDC**, eliminating long-lived AWS credentials.

Chunk'd Cookies — Product-Drop E-Commerce Platform | chunkdpk.com

- Built with **Next.js, Typescript & MongoDB** a product-drop eCommerce store with box-size selection, daily order windows, coupon engine, dynamic delivery logic, **product CRUD** and **sales analytics** dashboard all managed via a JWT-secured admin panel.
- **Optimized** Responsive design, **SEO** & **performance-focused** architecture, achieved 100/100 Lighthouse Performance and SEO.

Zevora Official — Multi-Category Fashion E-Commerce | zevoraofficial.com

- Built a **Next.js 16, TypeScript & MongoDB** e-commerce platform with admin dashboard featuring category filtering, product search, secure checkout, and Cloudinary-optimized media delivery.
- Drove **16K+ Google Search impressions** and a **10% increase in online orders** by implementing **technical and on-page SEO**, achieving **100/100 Lighthouse Performance** and **<0.8s page load times** through **SSG, SSR, and performance optimization**.

EXPERIENCE

Founder & Full-Stack Engineer | Scrupulous (Software Agency) Aug 2025 – Present

- Delivered **20+ production web applications** for clients in Pakistan, Saudi Arabia and the UK, owning the full lifecycle: requirements, Figma design, data model, API, Vercel/DNS deployment and post-launch support.
- Architected Next.js and TypeScript systems on MongoDB, Cloudinary and NextAuth/JWT with secure admin dashboards for product CRUD, order fulfilment, coupon engines, dynamic delivery charges, review moderation and real-time sales analytics.
- Executed technical SEO (dynamic metadata, JSON-LD, XML sitemaps, tags, Search Console) consistently reaching **99+ Lighthouse** scores.
